## PROFILE

Full-stack developer (React / TypeScript, Python / FastAPI). I build tested, deployed applications that integrate generative AI: multi-provider LLMs, tool calling, structured outputs, RAG and streaming. I also run a multi-agent automation platform in production. 3 years of web development, then 2.5 years of application engineering.

## PROFESSIONAL EXPERIENCE

### Application & Data Management Engineer — Jan 2024 - Jun 2026

**DARES** | *French Ministry of Labour, statistics & research directorate*

- L1/L2 application support for ~300 users in a critical environment: deployment, access rights, remote database access (ODBC), R / RStudio environments.
- Secured sensitive data exchanges with INSEE (national statistics) and France Travail (employment agency) through the CASD secure enclaves (SD-Box terminal, card, code and fingerprint, no Internet access), with day-to-day support for their users; ~100 tickets a month, from business requirements to validation.

### Web Developer — Sep 2020 - Aug 2023

**DEFI-METIERS** | *Greater Paris public agency for vocational training*

- Developed and maintained the agency's public web platforms (Drupal / PHP) for training providers and career advisors.
- Migrated the regional training catalogue from Dokelio to Ofeli: redesigned and optimized SQL queries on high-volume data.

## TECHNICAL PROJECTS

### Netherbrain — 2026

*LLM orchestration platform*

- Full-stack: FastAPI back end (Pydantic, Alembic), PostgreSQL + pgvector, React / TypeScript front end, SSE streaming; 300+ automated tests, GitHub Actions CI, Docker Compose.
- Multi-provider LLM integration: OpenAI API and compatible APIs (local Ollama on GPU, OpenRouter, Groq), RAG over attached documents.
- Tool-using agent: multi-turn tool calling loop over files and git, with a diff shown and user approval before every write.

REPOSITORY github.com/sma-ali/Netherbrain

### alismaani.fr — 2026

*Interactive 3D résumé*

- Next.js / strict TypeScript: hands-on 3D desk (React Three Fiber, Rapier physics), HTML version for SEO, FR / EN content validated with zod.
- TypeScript server routes: contact form validated server-side, rate limiting, bot trap, email delivery; security headers, deployed on Vercel.
- 600+ Vitest tests and 150+ Playwright tests (desktop, mobile, accessibility) in CI.

REPOSITORY github.com/sma-ali/CV-Desktop

### Homelab — 2026

*self-hosted infrastructure*

- Dedicated server running Proxmox behind an OPNsense firewall, reachable only through a self-hosted WireGuard VPN; hardening: IPv4 + IPv6 host firewall, 2FA, key-only SSH.

REPOSITORY github.com/sma-ali/Homelab-Demo

### Multi-agent automation platform — 2026

*personal project in production*

- LLM pipelines in Python on a self-hosted VM (Proxmox, OPNsense, WireGuard): specialized agents, automated review (LLM-as-judge), human validation, then automatic publishing; cost and model optimization.

## SKILLS

**Front-end**

React, TypeScript, Next.js, Vite, Tailwind, Three.js (React Three Fiber)

**Back-end**

Python, FastAPI, Pydantic, REST API, SSE, SQL, PostgreSQL / pgvector, Alembic, Node.js / Express, PHP / Drupal

**Generative AI & LLMs**

Claude API (Anthropic), OpenAI API, Hugging Face, Ollama / GGUF, AI agents, Multi-agent systems, Tool calling, Structured outputs, RAG, Vector database (pgvector), Prompt engineering, Prompt caching, LLM-as-judge, Benchmarking, Multimodal (vision), Claude Code

**Voice & video**

Speech-to-text (Whisper), Forced alignment (MMS), Text-to-speech (ElevenLabs), FFmpeg

**Machine learning**

PyTorch, Neural networks, Hyperparameter tuning

**DevOps & quality**

Docker / Docker Compose, GitHub Actions, CI/CD, Git, pytest, Vitest, Playwright (E2E), Vercel, Linux, Nginx, Proxmox

**Methods**

Agile / Scrum, Jira

## EDUCATION

**Master's Degree | Computer Science & Information Systems**

*EPSI Paris La Défense · Apprenticeship*

2021 - 2023

**Bachelor's Degree | Web Development**

*My Digital School, Paris · Apprenticeship*

2020 - 2021

## LANGUAGES

French ..... Native
English ..... Bilingual (C2)

## STRENGTHS

Self-directed & proactive
Fast learner
Turning business needs into software
Strong written & verbal communication

## INTERESTS

- Theatre (6 years, performed at the Odéon national theatre)
- Football / Grappling / Weight training
- Competitive esports (League of Legends, top 0.1%)
